## SUMMARY

Detail-oriented and results-driven Data Analyst / Scientist with a strong foundation in computer science and a proven track record in data auditing, system analysis, and machine learning. Skilled in utilizing various data tools and platforms to deliver actionable insights and enhance business operations. Seeking to leverage analytical and technical expertise in a dynamic environment.

---

## EDUCATION

**Universiti Sains Islam Malaysia**

*Nilai, Negeri Sembilan | Sep 2018 - Dec 2022*

Bachelor of Computer Science with Honours, Information Security and Assurance

CGPA: 3.70 / 4.0

---

## EXPERIENCE

**PwC Malaysia | Intern, Digital Auditor**

*Federal Territory of Kuala Lumpur | Nov 2023 - Feb 2024*

- Created detailed documentation for data massaging guidelines, reviewed SQL scripts, and developed flowcharts to illustrate processes.
- Conducted IT Governance Controls (ITGC) audit, assisting in evidence-gathering activities in Aura Platinum, ensuring compliance with guidelines.

**Pipeline Network | Associate, System Analyst**

*Petaling Jaya, Selangor | Aug 2022 - Jan 2023*

- Documented system requirements, performed data transformation in Excel, and created Tableau dashboards based on client requests.
- Managed Software Development Life Cycle (SDLC) phases, ensuring timely submission of deliverables.

**Setel Ventures | Intern, Analyst**

*Federal Territory of Kuala Lumpur | Mar 2022 - Jul 2022*

- Resolved system issues by tracking, fixing, documenting, and communicating with various departments.
  - Updated ticket bugs' status in Jira software and gathered information for dashboard reporting, highlighting persistent issues.
- 

## SKILLS

**Programming Languages:** Python, R, SQL

**Libraries / Frameworks:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-Learn, XGBoost, RPA

**Tools / Platforms:** Jupyter Notebook, Tableau, Microsoft Power BI, Microsoft Excel, Microsoft 365, Google Workspace, GCP, AWS, UiPath

---

## PROJECTS

**HR Analytics Job Prediction | [Link](#)**

*Kaggle*

- Compared machine learning algorithms (Logistic Regression, Decision Tree, Random Forest) to evaluate AUC, precision, recall, F1-score, and accuracy.

**Cyclistic Case Study | [Link](#)**

*Tableau*

- Performed ETL in Google BigQuery, imported data into Tableau, and created visual dashboards to provide insights.

**Capturing and Retrieval of HIRARC for Laboratory Experiment | [Link](#)**

*GitHub*

- Implemented Waterfall Methodology using Python, Django, and SQL, deployed the project on GitHub.
-
